Shelving Units

GENERAL

Shelving shall be of the type manufactured by International Storage Systems and known as I.S.S. Shelving. A shelving unit shall be able to be assembled without tools. When the plastic Sure Lock™ corner insert is secured to the round post and the shelf lowered into place the shelving unit shall be free from sway or rocking without the need for additional bracing. The one piece molded plastic Sure Lock™ shall be of a hinged design with two internal ridges that fit secure into the post grooves. The ribbed exterior of the Sure Lock™ grips the inside of the corner ring to securely lock the shelf to the post. Corner rings shall be 1 15/16 inch in height formed to create a precision tapered opening that works in combination with the post and ribbed Sure Lock™ to form a stable, heavy load bearing shelving unit.

DESCRIPTION

The shelving design shall incorporate multiple trusses running lengthwise in addition to a truss on each end of the shelf. This design shall provide for a rigid framework to minimize deflection under load and to allow for uniform weight loading of up to 1250 lbs. per shelf. Each shelf shall have a minimum of 4 trusses running the length of the shelf. The outer trusses shall be of a vertical design. The intermediate and end trusses shall be of a serpentine design.

The shelving shall be fabricated of C1006 Plating Quality Carbon Steel or of Stainless Steel. The shelf deck shall have a raised edge on all 4 sides a minimum of .200" high. Running the length of the shelf shall be 2 die formed marine edges, and on the ends the top rod of the truss shall be raised above the shelf deck. Each shelf shall have ribs of 9 ga. wire on 1" centers running front to back. Perpendicular to these 9 ga. ribs there are additional support rods of 4 ga. wire running the length of the shelf.

POSTS

Posts shall be of 1" round tubing with .065" (16 gauge) thick walls made of plating quality cold rolled steel having grooves spaced 1" apart with embossed numbers. Each post shall have a plastic top cap and a leveling foot.

FINISHES

- **GOLD BOND®** - Bright Zinc plating followed by the Gold Bond® Chromate Process with an abrasion and corrosion resistant baked polyester/epoxy polymer top coat. Use in Dry Storage, Coolers and Freezers.

- **ACCESSORIES** - The following accessories are available. Foot Plates, Ledges, Dividers, Post Clamps, Bin Markers, Enclosure Panels and Casters.

WARRANTIES

LIFETIME WARRANTY- International Storage Systems warrants that its products will be free from defects in material and workmanship for the life of the product. This offer is valid for the original purchaser of the product.

FINISHES- **GOLD BOND** and **Super Seal** shelves and posts are warranted for a period of 15 years against rust formation.
